SUMMARY

Full-Stack Software Engineer experienced in end-to-end application delivery, legacy integrations, and production support. Strong in **Java**, **Spring Boot**, **Kafka**, **React**, and DevOps workflows. Known for rapid learning, taking ownership of distributed systems, and choosing solutions that balance reliability, scalability, and real product needs.

EDUCATION

B.Sc. (Hons) in Engineering — Computer Science and Engineering, University of Moratuwa 2022 – 2026
G.C.E. A/L: 3 A's, Physical Science Stream, District Rank 17

EXPERIENCE

R&D Software Engineer — KōreroCare Platform Mar 2026 – Present
Empathic Computing Laboratory, University of Auckland Remote

- Co-led backend design for the **KōreroCare** mobile-wearable sensing platform, building **Go/Gin**-based services for time-series ingestion and cross-device synchronization.
- Designed **PostgreSQL** schemas for participants, studies, devices, consent, reminders, and wearable sensor streams.
- Integrated **Keycloak OAuth2/OIDC** with **Traefik** gateway routing and Docker Compose deployment for secure internal service access.
- Developed Firebase notification and reminder flows for participant engagement and study prompts.
- Modeled an **HL7/FHIR**-aligned data schema mapping participants, devices, and wearable measurements.

Software Engineer Intern — ISA Aviation Technology Dec 2024 – May 2025
Information Systems Associates (Pvt) Ltd Colombo, Sri Lanka

- Owned design and delivery of a distributed **Spring Boot/Kafka**-backed PNR ID generation service, **live in production**, achieving **25+ PNRs/sec** at **<100ms latency**.
- Designed a **pool-based PNR allocation model** to replace legacy Oracle-sequence generation, supporting short domain-specific PNR formats while avoiding predictable sequential identifiers.
- Implemented **concurrency-safe** PNR allocation using a **Kafka-backed pool**, ensuring the same PNR was not assigned to multiple service instances, while using Java **ReentrantLock** for application-level critical sections.
- Led the rollout from legacy PNR generation to AeroOrder using database-driven **feature toggles** and a **strangler-pattern** migration approach for phased production cutover and fallback.
- Resolved production **Kafka consumer lag** and offset-reset issues by adding graceful shutdown hooks, retry handling, validation, and a Producer-Consumer refactor.
- Integrated **gRPC** clients and Kafka consumers into the legacy **Java 8** AeroMart monolith for backward-compatible communication with AeroOrder microservices.
- Built async load-testing and monitoring support using **JMeter**, **Prometheus**, and **Grafana** to validate PNR/order flows, queue time, consumer behavior, and service latency.
- Added Jenkins environment support, maintained **>90% unit test coverage**, and coordinated delivery with QA and distributed engineering teams.

PROJECTS

- E-Commerce Admin Dashboard
Built a responsive admin dashboard with layered CQRS architecture. Technologies: Next.js, tRPC
Next.js, Prisma, tRPC
- Employee Management System
Developed a full-stack HR management portal. Technologies: Spring Boot, React
Spring Boot, React
- Interactive 3D Portfolio
Created a high-performance 3D website with safe SSG pipeline. Technologies: React Three Fiber, Puppeteer
React Three Fiber, Puppeteer
- Supply Chain DApp
Built real-time shipment tracking frontend integrated with smart contracts. Technologies: Next.js, Tailwind
Next.js, Solidity

SKILLS

Backend: Java, Spring Boot, Go/Gin, Python, Node.js, REST, gRPC, GraphQL, Hibernate
Frontend: React, Next.js, TypeScript, JavaScript, React Query
Messaging & APIs: Kafka, RabbitMQ, WebSockets, Protobuf, JWT, OAuth2/OIDC
Data: PostgreSQL, MySQL, Oracle DB, Redis, Couchbase, DynamoDB, Prisma
Cloud / DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux
Observability / Testing: Prometheus, Grafana, JMeter, Gatling, JUnit, Mockito, Pytest
