SUMMARY

Software Engineer with production experience building Java/Spring Boot microservices, Kafka-backed distributed systems, and gRPC integrations. Delivered backend services and rollout strategies for production systems, including a Kafka-backed PNR generation service handling 25+ PNRs/sec at <100ms latency, with additional experience in PostgreSQL, Go/Gin, Docker, Kubernetes, CI/CD, and observability.

EDUCATION

B.Sc. (Hons) in Engineering — Computer Science and Engineering, University of Moratuwa 2022 – 2026
G.C.E. A/L: 3 A's, Physical Science Stream, District Rank 17

EXPERIENCE

R&D Software Engineer — KōreroCare Platform Mar 2026 – Present
Empathic Computing Laboratory, University of Auckland Remote

- Co-led backend design for the **KōreroCare** mobile-wearable sensing platform, building **Go/Gin**-based services for time-series ingestion and cross-device synchronization.
- Designed **PostgreSQL** schemas for participants, studies, devices, consent, reminders, and wearable sensor streams.
- Integrated **Keycloak OAuth2/OIDC** with **Traefik** gateway routing and Docker Compose deployment for secure internal service access.
- Developed Firebase notification and reminder flows for participant engagement and study prompts.
- Modeled an **HL7/FHIR**-aligned data schema mapping participants, devices, and wearable measurements.

Software Engineer Intern — ISA Aviation Technology Dec 2024 – May 2025
Information Systems Associates (Pvt) Ltd Colombo, Sri Lanka

- Owned design and delivery of a distributed **Spring Boot/Kafka**-backed PNR generation service, **live in production**, achieving **25+ PNRs/sec** at **<100ms latency**.
- Led the rollout from legacy PNR generation to AeroOrder using database-driven **feature toggles** and a **strangler-pattern** migration approach.
- Resolved production **Kafka consumer lag** and offset-reset issues by adding graceful shutdown hooks, retry handling, validation, and a Producer-Consumer refactor.
- Integrated **gRPC** clients and Kafka consumers into a legacy **Java 8** AeroMart monolith for backward-compatible communication with AeroOrder services.
- Built load-testing and monitoring support using **JMeter**, **Prometheus**, and **Grafana** to validate async order/PNR flows, queue time, and service latency.
- Added Jenkins environment support and maintained **>90% unit test coverage** while coordinating delivery with QA and distributed engineering teams.

PROJECTS

- Employee Management System Spring Boot, React, Docker
 - Technologies: Docker, PostgreSQL
- Go gRPC GraphQL Orchestrated multi-tenant microservices using Docker Compose. Go, gRPC, Docker Compose
 - Technologies: Go, Docker
- Serverless Auction AWS Lambda, DynamoDB
 - Technologies: AWS
- GoTogether Go, Kubernetes
 - Containerized and orchestrated a ride-sharing backend using K8s.
 - Technologies: Go, Kubernetes

SKILLS

Backend: Java, Spring Boot, Spring Cloud, Microservices, Go/Gin, Node.js, REST, gRPC, GraphQL, Hibernate

Messaging & APIs: Kafka, RabbitMQ, WebSockets, Protobuf, JWT, OAuth2/OIDC

Data: PostgreSQL, MySQL, Oracle DB, Redis, Couchbase, DynamoDB, Prisma

Cloud / DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD

Observability / Testing: Prometheus, Grafana, JMeter, Gatling, JUnit, Mockito, Pytest
