Summary

Full-

Stack Software Engineer experienced in end-to-end application delivery, legacy integrations, and production support. Strong in **Java**, **Spring Boot**, **Kafka**, **React**, and DevOps workflows. Known for rapid learning, taking ownership of distributed systems, and choosing solutions that balance reliability, scalability, and real product needs.

Skills

Backe

Java, Spring Boot, Go/Gin, Python, Node.js, REST, gRPC, GraphQL, Hibernate

Frontend: React, Next.js, TypeScript, JavaScript, React Query

Messaging & APIs: Kafka, RabbitMQ, WebSockets, Protobuf, JWT, OAuth2/OIDC

Data: PostgreSQL, MySQL, Oracle DB, Redis, Couchbase, DynamoDB, Prisma

Cloud / DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux

Observability / Testing: Prometheus, Grafana, JMeter, Gatling, JUnit, Mockito, Pytest

Experience

R&D Software Engineer — KōreroCare Platform

Mar 2026 – Present

Empathic Computing Laboratory, University of Auckland

Remote

- Co-led backend design for the KōreroCare mobile-wearable sensing platform, building Go/Gin-based services for time-series ingestion and cross-device synchronization.
- Designed PostgreSQL schemas for participants, studies, devices, consent, reminders, and wearable sensor streams.
- Integrated Keycloak OAuth2/OIDC with Traefik gateway routing and Docker Compose deployment for secure internal service access.
- Developed Firebase notification and reminder flows for participant engagement and study prompts.
- Modeled an HL7/FHIR-aligned data schema mapping participants, devices, and wearable measurements.

Software Engineer Intern — ISA Aviation Technology

Dec 2024 – May 2025

Information Systems Associates (Pvt) Ltd

Colombo, Sri Lanka

• AeroOrder

- Owned design and delivery of a distributed Spring Boot/Kafka-backed PNR ID generation service, live in production, achieving 25+ PNRs/sec at <100ms latency.
- Implemented concurrency-safe PNR allocation using a Kafka-backed pool and Java ReentrantLock for application-level critical sections.
- Led the legacy-to-microservice PNR rollout using database-driven feature toggles and a strangler-pattern migration approach.
- Resolved production Kafka consumer lag and offset-reset issues by adding graceful shutdown hooks, retry handling, validation, and a Producer-Consumer refactor.
- Built async load-testing and monitoring support using JMeter, Prometheus, and Grafana to validate PNR/order flows.

• AeroMart

- Integrated gRPC clients and Kafka consumers into the legacy Java 8 AeroMart monolith for backward-compatible communication with AeroOrder microservices.

• Engineering Practices

- Added Jenkins environment support, maintained >90% unit test coverage, and coordinated delivery with QA and distributed engineering teams.
